**WHOLESALE  
NURSERYMEN**

WHOLESALE DEPARTMENT

Dreshertown, Montg. Co., Pennsylvania

**300 ACRES**

Founded 1854 by Thomas Meehan  
Incorporated 1902  
Capital Stock, \$100,000

J. Franklin Meehan, President  
S. Mendelson Meehan, Vice-Pres.  
Thomas B. Meehan, Sec. and Treas.

# Wholesale Trade List

SPRING 1908

**I**N preparing this, our Wholesale Trade List for Spring 1908, we have aimed to present our large collection of Hardy Ornamentals to the purchaser in the most concise form. With this object in mind and in view of the fact that it is intended for the trade, illustrations and descriptions have been purposely omitted. To those unacquainted with the stock, however, we will gladly furnish descriptive matter upon application. In fact, we delight in giving information pertaining to Hardy Ornamental Plants and inquiries are solicited.

**Customers** are requested to state the mode of conveyance by which they desire their trees forwarded. When no route is named we forward to the best of our judgment.

**Responsibility** —After goods are placed on board cars here we assume no responsibility for their safe or prompt delivery, or any injury caused by delay in delivery by the transportation company.

**All Claims** MUST BE MADE UPON RECEIPT OF GOODS.

**Terms** Cash, on or before delivery to express or railroad agents, unless by special arrangement.

**Two Hundred and Fifty**, twenty-five and five will be furnished at the thousand, hundred and ten rates respectively.

**Packing Charged Extra**, but only sufficient to cover cost of time and material.

**Post Office Orders** payable at Dreshertown, Montgomery Co., Pa. Postal Telegraph Office, Dresher, Pa.

**Visitors** are always welcome and should take train at the Reading Terminal, 12th and Market Streets, Philadelphia, for **Camp Hill Station**, or at Broad Street Station, Pennsylvania R. R., for **Fort Hill Station**. Be sure that the train you take stops at these stations.

**Notice.**—It is necessary that you should Telephone us (Bell Phone, 226 Ambler; Keystone Phone, 76-Y Jenkintown), in advance of your coming, so that we can send a carriage to the station for you. Our office is  $2\frac{1}{2}$  miles from either station.

---

## THE COMMONWEALTH OF PENNSYLVANIA

DEPARTMENT OF AGRICULTURE

### Certificate of Inspection of Nursery Stock No. 1115.

This is to certify that the stock in the nursery of **THOMAS MEEHAN & SONS, INC.**, of Dreshertown, County of Montgomery, State of Pennsylvania, was duly examined in compliance with the provisions of the Act of Legislature of Pennsylvania, approved the 31st day of March, A. D., 1905, and it was found to be apparently free from San Jose Scale and other dangerously injurious insect pest or pests.

This Certificate expires August 31, 1908.  
Dated Harrisburg, Pa., Sept. 9, 1907.

P. H. HERTZOG, Inspector.

*A. B. Critchfield,*  
Secretary of Agriculture

# Deciduous Trees

The price of nursery stock is fixed according to the value of the tree offered. The value of the tree depends entirely upon the character of the stock and it is this "value" which makes prices differ in the catalogues of nurserymen. Stock that is sold at a low price is grown with the least possible expense put upon it, but at a sacrifice to the "quality." Stock that is thoroughly cultivated, grown in good soil, well manured and several times transplanted cannot be grown cheaply, but its "value" to the planter is increased, and in the long run such stock is cheaper than poorly grown stock at a "low price."

We bring up-to-date methods into the production of our goods. Our soil is especially adapted for the growing of good nursery stock. We spend thousands of dollars yearly in manures and in cultivating; besides this our trees are frequently transplanted. We cull out and burn all crooked and imperfect trees so that our customers receive full value for the prices charged.

Intending purchasers of nursery stock should keep this in mind when comparing our prices with others. A visit to our nurseries will convince any one of the statement we make.

We call particular attention of customers to the trees marked "Specimens." These are trees that have been frequently transplanted, set wide apart in nursery rows and are well developed in every way.

## JAPANESE MAPLES

Our Japanese Maples are not imported stock. They are propagated and grown here. Imported stock is poorly rooted, hide-bound and of irregular shape. It rarely succeeds and is frequently not true to name. We have been propagating our own Japanese Maples for thirty-five years and our stock will succeed where imported plants fail. The polymorphum atropurpureum are grown from layers, consequently on their own roots, and are very bushy plants. The pot grown plants are especially adapted for fall planting. They will be shipped with the ball unbroken.

The <b>Cedrelia sinensis</b> is a tree similar in appearance and general character and habit to the <i>Ailanthus</i> , and will thrive under similar conditions, but it does not have the disagreeable odor when in flower. It is without doubt one of the best trees for street planting in cities and will thrive where no other tree will grow.

All of the above Magnolias are of our own propagating and grown from layers, and are on their own roots. These are much healthier and better than imported stock; this is especially the case with the Halleiana. Each plant will be dug with a ball of earth and the ball sewed in burlap. The conspicua are the true pure white variety.

## OAKS

Years ago we began advocating the planting of Oaks for all general purposes; now planters realize their merits. Now they are used for every purpose. They are planted on boulevards, avenues in parks and cemeteries and more recently in the cities. It makes a permanent tree, very free from insects and is unsurpassed by any other shade tree. The Pin Oak is particularly adapted for side-walk planting in cities and seems to thrive under the adverse conditions usually found in such places.

## Supplementary Catalogues

During the spring season we shall issue the following "Special Lists." If you are interested, drop us a line and we will mail you these lists as soon as they are issued.

**Ornamental Tree and Shrub Seedlings**     Suitable for setting in nursery rows. Our stock of these plants is the largest in the country. This list is now ready and orders for this stock should be placed early.

We make a specialty of this class of stock and have a long list of varieties. Plants are well established in 5-inch pots and tied to stakes. The plants are used mainly for planting after the regular shipping season is over. List ready about the 15th of May.

**"Red Star" Raffia, Reeds, etc.**   We handle only the well-known "Red Star" Brand Raffia. It needs no recommendation. It is the best on the market. Long strands, good color and strength. Quality guaranteed. **Reeds**—prime quality and in all required sizes. Price list ready now.

# Deciduous Shrubs

---

The height of a shrub does not indicate its value to a customer when making comparison in prices. Some nurserymen plant their shrubs thickly in the nursery rows, thereby gaining height, but such shrubs are not bushy. A shrub that is given ample room to develop bushiness will not make the same height in a given time as those which have been planted closely together. We set our shrubs wide apart in the rows and our plants are all good bushy stock; our prices are based on this fact, and customers are given full value for the prices we charge. The shrubs marked "specimens" are large, well developed plants, that have been given ample room in the nursery rows to fully develop, they have been several times transplanted, and they are exceptionally fine shrubs for immediate effect.

**HIBISCUS MEEHANI' VARIEGATA****NEW SINGLE FLOWERED VARIEGATED LEAVED  
ALTHAEA**

This is a new variety of the variegated leaved Althaea, the foliage showing the white and yellow variegation of the old variety, but which differs from the old variety inasmuch as the flowers open wide, and in a strong vigorous plant they are about four to five inches in diameter, while on the old variety the flowers do not open at all, but look like purple buttons.

The flower is of a purplish red color, single, and the plant blooms profusely.

This new variety of our common garden Althaea will be found perfectly hardy everywhere the old variety has proven so.

In many parts of the United States and Canada, Box Edging is not hardy, and a low, dwarf and compact plant is required as a substitute for it. The Viburnum opulus nanus has been found to be an excellent substitute for the Box Edging. It is naturally of a dwarf habit and will stand a lot of shearing, so that it can be kept down to a very small size. It does not bear any flowers and the leaves are smaller than the other varieties of Viburnum. It is perfectly hardy and can be planted in any part of the United States and Canada.

The Viburnum tomentosum is of a similar character and habit to the Viburnum plicatum, but instead of having balls of flowers, they are flat headed. In leaf and general growth it is about the same as the plicatum, and in fact it is frequently mistaken for that variety. It is perhaps a little stronger grower than the plicatum, and in some respects it is to be preferred. We have a particularly large and fine stock of this plant, and call attention to some of the specimen plants which we offer.

# Evergreens

All of our evergreens are specimens. Every tree is given careful attention and such varieties as Retinisporas, etc., requiring it, are sheared as often as necessary in order to produce a bushy symmetrical tree. They are all branched to the ground. We frequently transplant our evergreens and in that way, we get a mass of fibrous roots. In nearly every case, as noted in the catalogue, the trees will be dug with a ball of earth and the ball sewed in burlap. This makes the transplanting of them almost an assured success. Of course, the first cost of these evergreens dug and handled in this way, is more than common, but as the planter has practically no loss with them, he is saving money in the long run. Our stock must not be confused with low priced evergreens rarely transplanted and grown thickly together.

Our 4 to 5 inch Box Edging were all transplanted last Spring. They are nice, bushy little plants and well-rooted. This stock is of our own growing, it is not imported.

The 12 to 15 inch plants have been especially grown for edging purposes. They are very bushy and will make a solid edging immediately. Set two plants to the foot.

## Vines and Climbers

For Fall planting, our "pot-grown vines" are much more desirable than field grown stock. They have been established in pots all Summer, they are heavily rooted, and are less likely to "heave out" by frost in the Winter. We introduced this method of growing vines many years ago and customers now prefer it to field-grown stock for Fall work. When shipping, we knock them out of the clay pots and send in paper pots.

## Hardy Herbaceous Perennials, Ornamental Grasses and Ferns

The following is a list of stock we can supply in quantity. In addition, our immense collections contain many choice kinds not here mentioned.

Send us your list of wants and let us quote upon them.

We aim to grow only first class stock and send out neither old clumps of low vitality nor microscopic divisions, but young, vigorous plants that will give immediate results.

Our standard, where kind will allow, is one year, field grown.

**Good Knives** For budding, our "Empire" is the best. All ivory tapered handle. Patented after our own idea. 80c. each, 6 for \$4.50. "D" is next. Cocoa handle. Blade closes. Very popular. 35c. each, 6 for \$2.00. "C" a substantial knife. Stationary blade. 25c. each, 6 for \$1.30. Two good Pruning Knives—"A" a lightweight knife for general use. Ebony handle. 75c. each, 6 for \$0.75. "B," the nurserymen's choice. Strong blade. Round handle, steel cap on end. Far superior to "A," 85c. each, 6 for \$4.75. Prices include cost of postage. PRUNING SHEARS—"E," 75c. each, 6 for \$3.90. "F" is much better. Made of forged steel, patent spring. These are strong, substantial, and undoubtedly the best shears on the market. \$1.00 each, 6 for \$5.75.

**Labels** Following are the kinds mostly used by nurserymen. For 10,000 or more we allow a discount of 10 per cent. 1,000 3½-in. and 100 6-in. in a package. Not less than a full package sold.

3½-in., notched, iron wired, painted .....	\$1.00 per 1,000
3½-in., notched, copper wired, painted.....	\$1.25 per 1,000
6-in., notched, painted, but not wired.....	\$2.35 per 1,000
6-in., notched, not painted or wired.....	\$1.75 per 1,000

**Spades** The Best Nursery Spade. D Handle, Double Strap, Reinforced Nursery Spade. Weight 9½ lbs. Price, \$1.75 each, \$20.00 per doz. We have experimented with a number of different makes of nursery spades, but find this to be the strongest, best and most durable on the market. It is strapped full length of handle, both back and front, and half way up it has double straps, strengthening it in what otherwise would be its weakest parts. When ordering state if straight or taper blade is wanted.

# WELL GROWN LARKSPUR

We have a most beautiful lot of good, healthy Larkspurs that give promise of a wealth of bloom this season, in the strong growth they are at present making.

Set them out now and fill in the gaps in your perennial border.

**Chinese Larkspur.** This form, though not growing as tall as the others, flowers for a longer period and is on this account a very desirable kind. We have both the blue and pure white.

**Formosum.** This is a tall, showy, indigo blue, having longer spikes of flowers than the former. A desirable sort.

**English Hybrids.** These are grand and showy. The long spikes shade from a deep, dark blue to light, soft shades. Unusually strong and vigorous.

**Strong Potted Plants, 25 cents each**

<b>10 in assortment,</b>	<b>-</b>	<b>\$2.00</b>
<b>10 of one variety,</b>	<b>-</b>	<b>\$1.50</b>
<b>25 in any assortment,</b>	<b>-</b>	<b>\$3.75</b>
<b>100 for \$15.00</b>		

What cheerful effects are to be had in late Fall with the Old-fashioned Hardy Chrysanthemums

## Old-fashioned Chrysanthemums

Out of a large and varied collection of Hardy Chrysanthemums we have selected a list of excellent, dependable kinds that will gladden the heart of the lover of these old-time favorites. White, yellow, pink, deep maroon—in fact, all shades. These pot-grown plants are young and thrifty, and to be preferred to the old, less vigorous plants.

Pot-grown, 25 cents each      10 assorted, \$2.00      25 assorted, \$3.75

The tall spikes of rich purple Foxgloves cannot be duplicated by any other perennial

## Purple Foxglove

The rich effect obtainable with the full spikes of purple Foxgloves account for their great popularity. We have some unusually strong, healthy plants in pots.

**Pot-grown, 25 cents each      10 for \$1.50      25 for \$3.75**

Mid-summer finds the Phlox in its brightest colors predominating the hardy garden

## Hardy Summer Phlox

A big, bright display may be had *this Summer* from our strong, healthy, potted plants of the old-fashioned, hardy Phlox. Not small seedlings or cuttings but the size that will bring quick satisfactory results

The very best varieties only are given in this list.  
**Independence** - A large, pure white Phlox of great beauty.  
**J. H. Slocombe** - A very bright fiery crimson with a dark eye.

**L'Evenement** - A beautiful, rich salmon pink.

**Queen** - A large panicle, pure white.

**L'Esperance** - A beautiful, bright lilac, prettily shaded.

**Mad. P. Langier** - Bright red, vermillion center.

**Coquelicot** - Fine pure scarlet with deep carmine eye.

**Strong potted plants, 25 cents each**

**10 of one variety      -      \$1.50**

**10 in assortment      -      \$2.00**

**SPECIAL—25 in assortment, \$3.75; 100 for \$15.00**

GROWERS OF THE RIGHT KIND OF HARDY PLANTS

GERMANTOWN

PHILADELPHIA

(OVER)

**Hibiscus Syriacus Meehani Variegata**  
(New Single-flowered Variegated-leaved Althæa.)

THE old variegated-leaved Althæa is one of our best shrubs where a plant with colored foliage is required, but unfortunately the flowers do not open, consequently the general flowering effect is lost.

This new variety far surpasses the old form in as much as the flowers, though single, open completely, and the color, which is of a purplish red, makes a strong contrast to the yellowish white variegation of the foliage.

Visitors to our nurseries declare this to be one of the best introductions in the horticultural field in recent years, and we have already booked numerous orders from those who have seen the plant growing on our grounds.

The above illustration shows the free-blooming character of this plant. The flowers are larger than the other varieties of Althæa. The plant is as hardy as the old variegated-leaved form.

This will doubtless be a profitable plant for all nurserymen, dealers and agents to handle. Illustrated circulars and colored plates will be furnished to those in the trade at prices below cost. Half-tone illustrations in various sizes, both small and large, suitable for use in catalogues will be furnished without cost to customers who order plants from us.

Sample colored plates, circulars and proof of these half-tone cuts, also terms on same will be sent upon application.

For sizes and prices of plants see pages 18 and 19 of this catalogue.
